

Edge Sentinel - Daily Planner

June 2026 - December 2026 | CAT + DSSSB ASO + IBPS PO + JLPT N4 + 5 GitHub repos

Owner	Mohanees Singh Manral
Period	23 Jun 2026 -> 31 Dec 2026 (~27 weeks)
Print	Double-sided A4, keep on desk
Refresh	Regenerate at start of each month
Source	docs/daily_routine.md

Dashboard snapshot

PROJECTS 5 Edge Sentinel + 4 siblings	TESTS 14/14 pytest suite, all green	PIPELINE 1 cmd scripts/run_demo_pipeline.py
STREAK 30+ Edge Sentinel commits since Jun	PAPER v1 IEEE Access skeleton in docs/paper/	EXAMS 4 CAT / DSSSB ASO / IBPS PO / SSC JE

Weekday schedule (Mon - Fri)

Time block	Mon	Tue	Wed	Thu	Fri	Sat	Sun
06:30 - 07:00 CAT quant (1 video + 10 problems)	VARC practice	Quant practice	Reasoning + GK	Quant practice	DILR	PROJECT BUILD	PROJECT + MOCK
07:00 - 07:30 Japanese N4 (Anki + 1 Genki section)	VARC practice	Quant practice	Reasoning + GK	Quant practice	DILR	PROJECT BUILD	PROJECT + MOCK
19:00 - 20:30 Evening exam prep (rotates by weekday)	VARC practice	Quant practice	Reasoning + GK	Quant practice	DILR	PROJECT BUILD	PROJECT + MOCK

Weekend project block (Sat - Sun, ~10 hours)

Time	Activity	Duration	Type
Sat 09:00 - 13:00	Sibling repo build session	4 hours	BUILD
Sat 14:00 - 18:00	Edge Sentinel deep work	4 hours	BUILD
Sat 19:00 - 20:00	Plan + 1 light GitHub commit	1 hour	EXAM
Sun 06:00 - 09:00	CAT mock (alt weeks) + analysis	3 hours	EXAM
Sun 13:30 - 15:00	Repo commit + README + screenshot	1.5 hours	BUILD

Sun 15:00 - 16:00	Paper work (figures, table edits)	1 hour	BUILD
Sun 16:00 - 17:00	Japanese Genki	1 hour	EXAM
Sun 19:00 - 20:00	GK / current affairs (DSSSB + IBPS)	1 hour	EXAM

Daily habits tracker (tick every day)

Print 4 copies of this page; one per week. Keep the streak visible.

Habit	Mo n	Tue	We d	Th u	Fri	Sat	Su n
CAT problem set (≥ 5 problems)							
Japanese Anki (≥ 15 cards)							
GitHub commit (any repo)							
No social media before 07:30							
30-min walk / exercise							

30-second end-of-day commit

Run this every night before sleep. The contribution graph stays green; the streak stays alive.

```
$ cd "/Users/mohaneeshsinghmanral/Documents/Edge Sentinel Research Edition"
$ git status
$ git add .
$ git commit -m "docs: day-$(date +%j) progress note"
$ git push
```

The four daily rules (non-negotiable)

Rule	Action
1. CAT problem set (≥ 5 problems)	Open 2IIM or previous CAT papers, solve at least 5.
2. Japanese Anki (≥ 15 cards)	Open Anki on phone. Review 15 cards. Skip = 2 days catch-up.
3. GitHub commit (any repo)	Run the snippet above. 30 seconds. Done.
4. No social media before 07:30	Install Instagram + YouTube Shorts screen-time block. 90-min lock.

If a week runs hot, drop from the bottom of this list first

Drop order	Activity	Recover by
1 (first to drop)	GK / current affairs	Compress to 30 min
2	Japanese Genki reading	SRS Anki only, 10 min
3	Edge Sentinel deep work	Cut from 4 hr to 2 hr
4 (last to drop)	Sibling repo build	Move to following Saturday
NEVER DROP	CAT problem set / Anki / GitHub commit	These three are non-negotiable

Monthly milestones (Jun - Dec 2026)

Each month has one exam milestone and one project milestone. The two compound: a strong project lifts WAT-PI; a strong exam lifts the application pool.

Month	Exam milestone	Project milestone
Jun 2026	CAT quant basics	5 repos scaffolded + 30+ Edge Sentinel commits
Jul 2026	CAT 80+%ile mocks	Paper draft v1 + first sibling feature
Aug 2026	DSSSB ASO attempt	Paper v2 + bench data capture started
Sep 2026	CAT 95+%ile mocks	IEEE Access submission + bench data captured
Oct 2026	CAT final mocks	Real-data Edge Sentinel retrained
Nov 2026	CAT + IBPS PO	Paper revisions + 4 sibling repos MVP
Dec 2026	IBPS mains + DSSSB	JLPT N4 + portfolio locked

Weekly hour budget (~32.5 hours total)

Activity	Hours/week	Why it stays
CAT prep	12	Highest exam leverage
DSSSB ASO + IBPS PO	6	Syllabus overlap with CAT
Japanese N4	2	Daily SRS habit
Projects (4 sibling + Edge Sentinel)	10	Green contribution graph + paper
CAT mock analysis (every other Sun)	1.5	Drives percentile upward
GK / current affairs	1	DSSSB + IBPS
Total	~32.5	One full day off + ~3 hr breathing room

Weekly rhythm at a glance

Project work is the lever that lifts the exam-prep ceiling. A 2-min portfolio review (just the project + a 30-second summary) before any exam WAT-PI raises the conversion probability by a meaningful margin. Conversely, exam mocks force you to write under time pressure, which is the same skill as the paper's submission deadline. The two feeds compound, not compete.

Today's plan (fill in date on print)

Block	Activity	Done?
06:30 - 07:00	CAT quant: 1 video + 10 problems (2IIM)	■
07:00 - 07:30	Japanese N4: 15 Anki cards + 1 Genki section	■
19:00 - 20:30	Evening exam prep (VARC / Quant / Reasoning per weekday)	■
22:00 - 22:01	End-of-day GitHub commit (run the snippet)	■
